

Concrete cover:
 - At the bottom ,against ground; 50mm
 - Against form edge; 20mm
 - Others 20mm

Reinforcement index should be provided with all necessary details

- The stirrups will be made of dimension 8mm reinforcement bars

Type	Quality; steel grade	Quantity			Ø (mm)	Cutting length (mm)	MEASUREMENTS; (mm), ANGELS; (degrees)					R	
		GRP	ST/GR	TOTAL			End	a	b	c	d		End
				0									

- Detrmine the type of the stirrup according to the known standards.
- Calculate the partial measures for the stirrup.
- Complete the data in the Mini reinforcement index sheet above
- **Show your data to the Judge.**
- Cut and bend according to ininitial data
- **Show the stirrup to the judge**
- Make necessary adjustments and construct a final stirrup
